

COVID-19 DORMITORIES PROTOCOL

In compliance with the Order No. 5196/1756/2021 for approving measures of organising activities within education units/institutions under epidemiologically safe conditions for the prevention of SARS-CoV-2,

The following mandatory measures are instated:

Essential measures for preventing/limiting the infection with SARS-CoV-2	1	Rigurous hand hygiene
	2	Firm measures of cleaning and disinfection within students dorms
	3	Both tenants and hire staff must be wearing the protection mask during their stay in student dorms' common areas
	4	Contact among students, and between students and staff will be allowed either online, wearing a mask and maintaining a 1m distance from one another
	5	Avoiding the exchange of accommodation rooms between students
	6	Permanent maintenance of 1m distnace in student dorms' common areas
	7	Constnatly keeping tenants informed on the protection measures to be taken against the infection wiht SARS-CoV-2
	8	Isolation of tenants presenting COVID-19 symptoms (fever, cough, difficulty breathing, loss of taste/smell) and isolation of their roomates
Speciifc measures of protection in students dorms	1	Setting entrance and exit traffic routes, marked by visible straps, within student dorms
	2	Access of any foreign person in student dorms is strictly forbidden, with exceptional cases (with the approval of the head of the Social Service and/or of the dorm administrator)
	3	Access into the dorm will be permitted through one entry, based on student ID card (updated). Access of students, staff, doctoral students or any other who can justify their presence on campus will be done after epidemiologic triage according to the triage protocol and after hand disinfection upon entry into student dorms
	4	Insuring ventilation of common areas as frequently as possible

- 5 Insuring the daily cleaning and disinfection of common areas as per the operational procedure regarding the organisation and activity of cleaning to prevent the spread of SARS-CoV-2 in residencies – dormitories

- 6 Placing special bins for the disposal of used masks, upon the entry into student dorms
Beds and desks in student dorms will be placed so that students benefit from the maximum distance possible

- 7 Rooms will be occupied, as much as possible, by students who are enrolled in the same study programme, in order to limit contact of students from different study programmes

- 8 Raising awareness with posts/posters to limit access of more than two people, in common areas of student dorms

- 9 Movement within the student dorms will be limited and gatherings avoided

- 10 Placing disinfectants upon entry into student dorms

- 11 The mandatory compliance with the norms of hygiene within common areas and in rooms within student dorms – posters will be visible on each floor

- 12 Using cleaning products and virucides/antiviral agents that are approved by the Ministry of Health

- 13 Constantly informing staff on the protection measures against SARS-CoV-2

- 14 Articulating the specific operational procedures regarding the cleaning/disinfection and on the procedure to quarantine/isolate within student dorms

- 15 Daily check-up by the dorm administrator of the daily cleaning and regulate disinfection processes of frequently touched surfaces

- 16 Information on the proper hygiene will be posted on each floor of the student dorm

- 17 People's access and traffic will be managed upon entry into student dorms, by doormen, so that the physical distance of 1,5 m among people be complied with and by complying with the triage protocol

- 18 Instructing the staff in charge with security/surveillance in student dorms on the specific regulations of student dorms operations with the view to preventing/limiting the spread of SARS-CoV-2

	19	Weekly assessment of the availability of cleaning and disinfection products and their need, as well as those of equipment of personal protection for the use of the former
	20	The staff working within the dorms must observe and report students' health conditions, and they must report people who present respiratory symptoms
Individual protection measures in student dormitories	1	All students and hired staff must disinfect their hands upon entering the dorm and any time this is required
	2	All students and hired staff must wear the protection mask appropriately while in common areas of the dorms and during their activity within the student dorms
	3	Contact with frequently touched surfaces (doors, doorknobs, light switches, lift buttons etc.) must be avoided and everyone must disinfect their hands after touching such surfaces
	4	It is forbidden to exchange personal objects or use them jointly with other people
	5	It is forbidden to consume foods and beverages jointly with other people
	6	Bedrooms will be ventilated by their tenants for at least 30 minutes in the morning and as frequently as possible during the day
	7	Students will be informed on the provisions and obligations to comply with the isolation protocol
	8	Common areas will be avoided as much as possible, and study activities will take place in each student's bedroom (no warm food is to be cooked in bedrooms)
	9	Students must maintain cleanliness, disinfect and ventilate their rooms regularly
	10	Students accommodated in dorms must inform the dorm administrator of their absence from the student dorm during the night
Specific protection measures in student dorms during quarantine/isolation	1	In case of suspicion or confirmation of SARS-CoV-2 infection, the isolation protocol approved by the university will be in force
	2	Immediate isolation of the student presenting SARS-COV-2 symptoms and of their roommates will be in compliance with the individual protection measures
	3	The quarantined/isolated student from the dorm will not be taken to the general physician and/or the emergency room or hospital unless their symptoms are

severe; in that case, they will call 112 emergency number; the person helping the isolated student must avoid entering into contact with the latter, must wear a mask and thoroughly wash their hands for at least 20 seconds before and after interacting with said student

4 A special disinfectant will be used to hygienise the room, after the student is gone, in order to reduce the risk of infecting others

6 Employees working in student dorms and presenting symptoms of a possible infection must isolate at home, contact their general physician and immediately inform the dorm administrator

Individual protection measures	Frequently wash hands!
	Cough or sneeze in your elbow or in a handkerchief!
<i>Important messages</i>	Use a disposable handkerchief and throw it away!
	Greet others without shaking hands!
	Do not hug!
	Maintain physical distance, avoid crowds!
	Wear a mask when inside any building or outside in crowded places!
	Wear the mask appropriately – completely cover your nose and mouth!
