

## **MESSAGE TO THE UBB COMMUNITY**

Considering the growing number of infections with the SARS-CoV-2 coronavirus and the prevention measures taken on a national level in the resolutions of the National Committee for Emergency Situations and the Government Resolution No. 856/2020 regarding the prolongation of the state of alert in Romania, in order to increase the prevention measures, please be advised of the following:

Beginning with 4.11.2020, it is recommended that all information and operations requested to the university administrative departments (auxiliary didactic and non-didactic staff) be transmitted online, through the e-mail address of each department, address which may be found on the university website on the respective pages. We encourage using electronic devices to avoid exposure to the virus of all people involved.

If electronic means of communication are not opted for, documents may be submitted only upon online or phone appointment.

People who, however, go to the university and wait outside the administrative departments are required to keep a minimum distance of 1.5 – 2 metres.

We recommend all members of our community to act accountably, as excessive worry and panic may render administrative activities under normal circumstances more difficult.

We inform you that the working hours will remain unchanged.

We guarantee the UBB academic community that the safety of students and employees is a priority and, based on the evolution of the situation and the decisions of central authorities, we will adopt all necessary measures.
